

Sony Picture Profiles setup

Subject: Sony Picture Profiles & More.

Last Update: 9.8.2025

In this page i am trying to list down some of setup that works for me on my Sony camera [RX100M7] also I will tweek some default numbers in the picture profiles in the camera to get new look of colors.

Read and learn what are the attributes that we will change in the Sony Picture Profile. **Click Here**

Click Here to see the Fujifilm Simulation Recipes, my camera is X-T30ii.

Follow Me @ Instagram

Sony setting and Tips:

[All the settings and notes are related to the Sony **RX100Vii**]

Sony cameras has same effect creating as film simulations called "Picture Profile" there we can change some setting and save them under PP1,PP2 ... PP10 and can select any one when ever we want.

Picture Profile:

The Main two Profiles that I create once i got the camera were the Kodak Portra 400 and the ilford HP5 [Black and white] and I am enhancing them since then.

Lagging | Bad-Side of the Camera:

1. PP1..PP10 names can't be change in my camera **RX100Vii**.
2. Attributes names are not same as Fuji recipes names, so it is not easy to replicate my Recipes there.
3. The color temperature K [White Balace] can't be set/save with each Picture Profile, so we need to change it manually.
4. The Battery, you may need to consider to have two with you.

:: Sony RX100M7 Section ::

My Setting

- Sound off [all sound]
- ~~Disable the function of Control Ring.~~
- Re-Set the Control Ring to Zoom in/out.
- Set the Picture Profile in one of FN Boxs.
- File Format JPEG only
- JPEG Quality Fine
- JPEG Image Size 5m.
- Aspect Ratio 3:2

My Menu

Picture Profiles

- Kodak Portra400 mimic. [Under Adjustment, Try it] :: [See it Here](#) ::
- Classic Chrome. [Under Adjustment, Try it] :: [See it Here](#) ::
